**SAFETYTAC** *EDGE*

As with all of our SafetyTac floor marking tapes, SafetyTac EDGE is engineered to perform in all environments, even in the toughest manufacturing facilities. All SafetyTac products are chemical, water, UV, oil and grease resistant, and SafetyTac EDGE adds wheel-pivoting resistance as well.

SafetyTac is our #1 top selling floor tape, and for good reason: it's designed to outperform paint in even the harshest industrial environments!

SafetyTac EDGE's rigid material and super strong adhesive are designed to withstand turning and pivoting of wheels of forklifts, pallet jacks, and other industrial equipment without warping or pulling up off the floor. Additionally, it still has beveled edges to allow equipment with small wheel diameters to roll over the lines without issue.

SafetyTac EDGE resists wheel spinning and pivoting better than any other industrial tape on the market-
