SAFETYTAC LEAN

The days of using paint to mark aisles, pathways, and safety lanes are over! Industrial floor tapes are now widely regarded by both large and small companies alike to be the most effective, longest-lasting method for marking their warehouses and manufacturing floors.

SafetyTac Lean is based off our best selling SafetyTac line- retaining the great performance, yet reducing the profile by 40%. This reduced profile allows for carts and equipment with small wheels to move across the lines with ease and lowers potential for blunt impact which could compromise the adhesive bond.

Despite being half as thick as most industrial tapes, SafetyTac Lean outperforms nearly all industrial tapes thanks to its high-tac adhesive and dual beveled edges.

Installing SafetyTac could not be easier- Simply peel back the liner and apply it to a clean dry surface. Once it's down, just run over the tape with a tamper cart or forklift, and you're done! No longer do you have to have to shut down areas while you wait for paint to dry, or use valuable employee man-hours fooling around with messy paints in the first place.

Available Widths	2", 3", 4"
Roll Length	100' per roll
Tape Thickness	20 mil (1 mil = 1/1000")
Manufacturer	Creative Safety Supply
Country of Origin	USA
Application	Facility, Safety & Maintenance, Identification, General & Industrial Labeling, etc
Rated for	Most Heavy Industrial Traffic
